Future Proofing the Practice of Law

1 Dual

As of 2017, TN lawyers have an ethical duty of technological competence. However, many lawyers and law firms struggle to implement existing technologies, let alone stay ahead of the curve. In this session, we will:

- discuss what it means to be technologically competent in today's ever changing legal market;
- showcase how to implement and leverage the latest legal technology; and
- look ahead to how future technologies may impact the practice of law.

Joseph Kwon, Joe Kwon Law

9:30 - 10:30 a.m.

AI, ODR, ML and NLP: Acronyms for Future Proofing Legal Services

1 Dual

Legal technologies are known by their acronyms. Artificial Intelligence, Online Dispute Resolution, Machine Learning and Natural Language Processing are some of the emerging technologies which are being focused on the delivery of legal services. This session will demonstrate how these and other legal tech applications are making "access to justice" better, faster and cheaper for the benefit of clients and the lawyers who serve them.

Digital Forensics in the eDiscovery World

1 Dual

There is often confusion between the disciplines of eDiscovery and digital forensics, but from a civil litigation perspective, the same rules apply to both. While both provide value in litigation, the differences are distinct. This session will focus on how digital forensics fits into the eDiscovery process, the sources of digital evidence which require a digital forensics approach and how the digital forensics expert fits into the litigation process.

John Morris, Nashville Vanguard Law; CEO and Chief Legal Strategist, CyberTruth, LLC

12 - 1 p.m.

Using Technology in the Courtroom

1 Dual

This session will cover the following topics:

- Universal similarities in technology-enhanced courtrooms, including video display systems and document cameras
- How to prepare for the effective use of courtroom technology
- Creating demonstratives, and using them responsibly in the courtroom
- Using technology in complex cases, including contract disputes, automobile accident cases, medical malpractice, and patent infringement
- Technology on a budget or for small cases.
