Privacy in the Workplace

This presentation will cover a range of privacy-related topics in the workplace that may be of concern to both employers and employees. Kathleen will use real life examples to cover the importance of guarding an individual's or a company's private information, including when one's information was at risk or in question through social media, health care records, NDAs, and subpoenas. She will also provide insight on how remote working has increased privacy concerns on both sides of the employment relationship.
